Mohammad Raffi Akbar 1606917973 APAP – C write-up Tutorial 2

Latihan Project Viral

- 1. Ganti baris @RequestMapping("/viral") menjadi @RequestMapping("/viral2jari"). Kemudian run kembali.
 - a. Tidak
 - b. Whitelabel Error Page (not found, status 404), karena mapping awal /viral dipindahkan ke /viral2jari sehingga /viral tidak ditemukan

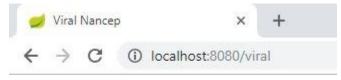

Whitelabel Error Page

This application has no explicit mapping for /error, so you are seeing this as a fallback.

Fri Sep 21 00:13:58 KRAT 2018
There was an unexpected error (type=Not Found, status=404).
No message available

- c. Melakukan mapping HTTP request ke fungsi controller
- 2. Ganti nama method index() menjadi nama method viral().
 - a. Tidak
 - b. Dapat diakses karena fungsi controller tidak mempengaruhi RequestMapping

Mashook Pak Ekoo!!

- 3. Ganti string return type menjadi menjadi return "viral2jari"
 - a. Tidak
 - b. Whitelabel Error Page (internal server error, status 500), method controller tidak dapat menemukan nama template yang direturn oleh method controller.

This application has no explicit mapping for /error, so you are seeing this as a fallback.

Fri Sep 21 00:39:14 KRAT 2018

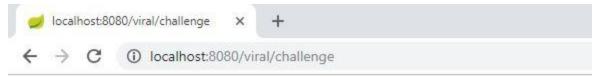

There was an unexpected error (type=Internal Server Error, status=500).

Error resolving template "viral2jari", template might not exist or might not be accessible by any of the configured Template Resolvers

c. Me-return nama file html yang akan dicari di folder recources/template (anotasi @Controller)

Latihan Request Parameter

- 1. Karena *thymeleaf* th:text menghapus teks yang ada di dalam sebuah atribut html (diantara tag pembuka dan penutup)
- 2. Ketika mengakses /viral/challenge mengeluarkan *Whitelabel Error Page (bad request, status 400)*

Whitelabel Error Page

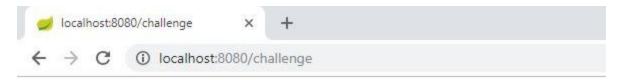

This application has no explicit mapping for /error, so you are seeing this as a fallback.

Fri Sep 21 01:02:13 KRAT 2018

There was an unexpected error (type=Bad Request, status=400).

Required String parameter 'name' is not present

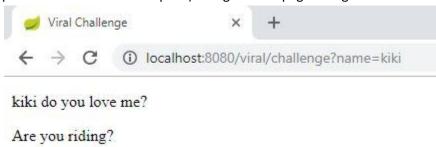

Ketika mengakses /challenge mengeluarkan Whitelabel Error Page (not found, status 404)

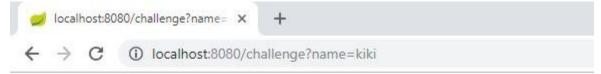

This application has no explicit mapping for /error, so you are seeing this as a fallback.

Fri Sep 21 01:00:51 KRAT 2018
There was an unexpected error (type=Not Found, status=404).
No message available

Kemudian, ketika mengakses localhost:8080/viral/challenge?name=kiki (menambahkan parameter melalui GET request) menghasilkan page sebagai berikut

Ketika mengakses localhost:8080/challenge?name=kiki tetap mengeluarkan Whitelabel Error Page (not found, status 404)

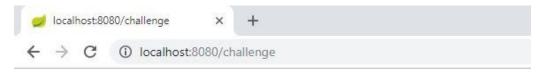

Whitelabel Error Page

This application has no explicit mapping for /error, so you are seeing this as a fallback.

Fri Sep 21 01:10:33 KRAT 2018
There was an unexpected error (type=Not Found, status=404).
No message available

- 3. Akses localhost:8080/challenge
 - a. Mengeluarkan Whitelabel Error Page karena parameter tidak terisi (bad request, status 400)

This application has no explicit mapping for /error, so you are seeing this as a fallback.

Fri Sep 21 01:18:28 KRAT 2018

There was an unexpected error (type=Bad Request, status=400).

Required String parameter 'name' is not present

 Page dapat diakses namun nilai yang diberikan pada name adalah null (parameter tidak perlu diisi, sehingga page mengeluarkan null sebagai nilai dari name karena merupakan default value dari parameter tersebut)

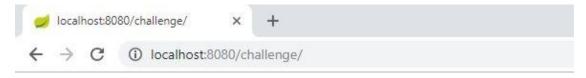

c. Page dapat diakses, nilai name adalah kiki karena kita sudah memberikan default value name pada RequestParameter yaitu kiki

Latihan Path Variable

 Mengeluarkan Whitelabel Error Page (bad request, status 400). Terjadi karena /challenge/ mengarah ke method controller challenge()

This application has no explicit mapping for /error, so you are seeing this as a fallback.

Fri Sep 21 01:32:17 KRAT 2018

There was an unexpected error (type=Bad Request, status=400).

Required String parameter 'name' is not present

Bila kita hapus/comment method controller challenge() dan menjalankan kembali program, maka akan menghasilkan page berikut

Whitelabel Error Page

This application has no explicit mapping for /error, so you are seeing this as a fallback.

Fri Sep 21 01:52:45 KRAT 2018

There was an unexpected error (type=Not Found, status=404).

No message available

2. Mengeluarkan *Whitelabel Error Page (internal server error, status 500)*. Terjadi karena /challenge/ mengarah ke method controller challenge()

Whitelabel Error Page

This application has no explicit mapping for /error, so you are seeing this as a fallback.

Fri Sep 21 01:38:35 KRAT 2018

There was an unexpected error (type=Internal Server Error, status=500).

Ambiguous handler methods mapped for HTTP path 'http://localhost:8080/challenge/": {public java.lang.String com.example.demo.controller.PageController.challengePath(java.util.Optional.org.springframework.ui.Model), public java.lang.String com.example.demo.controller.PageController.challenge(java.lang.String.org.springframework.ui.Model)}

Bila kita hapus/comment method controller challenge() dan menjalankan kembali program, maka akan menghasilkan page berikut

3. Page dapat diakses, dengan nilai name adalah kiki (sesuai dengan apa yang kita tulis di url dan dilempar menggunakan path variable)
